

A.M.D. ELECTRONIC S.R.L.

AUTOMATED SOLUTIONS FOR ARTWORK AND DOCUMENTS INSPECTION

A.M.D. Electronic founded in 1989, is the European distributor for Global Vision, the worldwide leader in the design and development of Electronic Proofreading systems and Inspection solutions. Our solutions allow replacing the manual inspection of art work, texts and Braille with electronic proofreading assuring a higher precision and accuracy reducing the costs.

The electronic proofreading unlike the manual one, is not subject to human mistakes and guarantees a remarkable saving of energy, time and money.

The main pharmaceutical companies all around the world rely on our industrial experience, taking advantage of our solutions to distribute their documents and products on the market, resetting to zero any risk of error in texts, artwork and Braille.

Our clients are satisfied from our solutions, since they can see real benefits from using them, such as:

- Faster time to market their products
- Higher efficiency in the Quality control process
- Higher productivity
- Less risk of goods reclaim.

Our last innovations feature state-of-the-art technology that assure artwork and documents precision. Among the major new releases that will be presented at PHARMINTECH there are:

BRILLE POINT

An innovative instrument for the verification of BRAILLE, which allows to measure the height, diameter and distance of every single dot.

DIGITAL PAGE – software for the inspection of Artwork

In few seconds, it automatically compares pixel to pixel graphic files of any format, highlighting all sorts of differences.

DOCUPROOF – texts comparator

This Software assures precision even of the most demanding documents, locating all differences in the inspected texts, no matter the layout or format of the document.
