

CRAMI GROUP SRL

NEW PRODUCTS AT PHARMINTECH 2010

- CRAMI

SS vacuum manifolds for microanalysis, CE certified. Construction in Stainless Steel with a large variety of models for various holders in SS, glass and polysulfone; accessories for an exact mounting.

- ADVANTEC MFS

Membrane in MCE, cellulose acetate, nylon, PTFE, polycarbonate and other polymers. Holders for vacuum or pressure filtration with membrane or cartridges.

- COMPUR MONITORS

Stattox 505 – Gas detection system in process monitoring, fixed mounting, for toxic gases and oxygen. ATEX certificate.

- ION SCIENCE

PhoCheck Tiger – With miniPID provides the best available detection and software features, ready to use straight out of the box. ATEX certificate.

- KNICK

Stratos-Pro – Controller for pH, mV, O₂. The unique color-guided backlit display guarantees maximum operating safety for 4- and 2-wire devices. For connection of all common analog and digital sensors. The innovative enclosure it's ideally suited for use in virtually any environment.

- SILVERSON

L5M – new functional laboratory scale mixer for liquids in liquid or solids in liquid. Various assemblies can be fixed on the mixer unit: standard, tubular, duplex, sealed-unit, in-line and ultramix.

In-line – a process mixer with recirculation method enables to mix, emulsify, homogenise, solubilise, suspend, disperse and disintegrate solids. Ultra-Hygienic, heating/cooling jacket, flameproof models and ATEX motors on request.
