

DAM RACCORDI SRL

The DAM raccordi s.r.l. presents itself with a thirty year experience in processing stainless steel. The company design and manufactures, solely at its factory in Italy, STAINLESS STEEL VALVES, FITTINGS and COMPONENTS FOR INDUSTRIAL PLANTS for cosmetic-pharmaceutical, food and chemical applications, with the goal of providing customers with components that meet the stringent requirements in terms of high build quality, warranty for advanced aseptic flow control on pharmaceutical plants and resistance to corrosion by aggressive fluids.

The thirty-year experience in stainless steel manufacturing (AISI 304L/316L) allows us to offer the market a standard production of “make to stock” fittings with fast deliveries. Other side the production flexibility in terms of volume and mix, aims to meet our customers demands of “designed and manufactured on specifics” devices, providing necessary expertise to solve problems due to a custom-made component design and development .

The DAM shows his renewed production to PHARMINTECH 2010 with a full line of products developed for the health sector with particular attention to facilities for the generation and transport of PURE WATER (WFI LOOP, PSG) FOR PHARMACEUTICAL NEEDS.

In this regard we point out some product lines that will be submitted to Pharmintech 2010:

- ASEPTIC VALVE
- MODULAR MULTI DEVICE ZERO DEAD LEG VALVE " - patent pending
- ASEPTIC INTEGRATED sampling VALVES for operator HIGH PROTECTION - Patent Pending
- FLEXIBLE CONNECTIONS to meet and complete all requirements for sanitary fluids transport between different parts of the plants. The materials used and careful implementation of the couplings ensure maximum compatibility with food, chemicals and pharmaceuticals aseptic production specifics.
- FULL FITTINGS SERIES ACCORDING TO CLAMP / GAS / DIN SPECIFICS

At PHARMINTECH 2010 we will be at disposal of our guests to go into detail on all the news submitted.
