

## GLATT COMBO

Nowaday flexibility and economical efficiency are a necessity for the pharmaceutical market. Glatt to fulfill those requirements offers a new line of fluid beds: Glatt Combo. The Combo's are versatile machines that can run "top spray" granulation processes and "coating" both "top spray" or "bottom spray" with small modification to the basic configuration of the machine. A blow back filter system with an innovative fixing system of the cartridges, is guarantee the continuous fluidisation of the bed.. The Combo's are including all the recent technological innovations adopted by the other fluid bed lines; they withstand to 12 bar of explosion pressure and, as they are build with high resistance alloys, they guarantee a minimal weight with the highest mechanical and chemical resistance. The great accessibility to all the parts of the plant are guaranteed by the special design of the container and of the lower section.
