

NIMAX SPA

NIMAX, EXPERIENCE AND SOLUTIONS FOR MARKING, IDENTIFICATION AND TRACEABILITY

Ever since 1970 Nimax has been dealing with technological automation and innovation in order to solve the various needs associated with product marking and traceability.

The range includes inkjet printers, laser coders for indelible printing, thermal transfer for printing on films, end line solutions both low and high resolution, up to the new thermal ink jet technology, ideal for cartons and blister packs, and print & apply solutions. Specific to the pharmaceutical, medical device and veterinary industry, in terms of substrate to be marked, Nimax offers the best suited solution in all the phases of the production chain, without omitting the software that enables the automatic transmission of the information to be marked.

The printing of text, messages, best before dates, batches, logos, barcodes, data matrix, serial numberings finds an ideal, reliable and operator friendly tool in Nimax coding solutions.

They are suited to all substrates and sizes and capable of reaching high speeds on industrial lines.

Besides both continuous ink jet and thermal ink jet and laser products can be supplied with validation packs for GAMP and 21-CFR part 11 compliance.
