

**PHARMINTECH EXHIBITION 2019 COMES TO THE END
WITH A GROWTH UP TO 10%
AND A SIGNIFICANT INCREASE OF FOREIGN ATTENDEES**

13 April 2019, Bologna, Italy - The sixth edition of **Pharmintech Exhibition**, the event organized by BolognaFiere, which focused the spotlight on technological innovation for the Life Science industry, has come to the end.

Pharmintech 2109 registered a growth up to 10% in attendance; the number of foreign industrial professionals has almost doubles.

"We are very satisfied with the results of this edition - says **Antonio Bruzzone, President of Pharmintech Srl and General Manager of Bologna Fiere** - The presence of 321 companies (115 from abroad, 36% of the total) and the great success in terms of attendance well represent the quality of Pharmintech 2019, which brought to light the excellence of the Life Science industry. Innovation, technology and research are the values leading the development of the sector. Along the corridors of the Bologna fair district in these days, the most advanced solutions for processing, packaging, instrumentation and management solutions of the supply chain, as well as digital and automation technologies applied to the sector, from the IoT - Internet of Things to data governance solutions."

"At this edition of Pharmintech, Italy presented itself with the recent result achieved at European level - says **Sergio Dompé, President of Pharmintech Exhibition** - Our country has earned the record as a pharmaceutical manufacturer in Europe, with a value of up to 44 billion euros and 2.7 billion euros invested in production, research and development. The 2019 edition of Pharmintech represented the further stimulus to the entire world of life sciences to further increase its know-how for the next future, in which this industry will follow the deep transformation taking place in our society, improving the quality of life of the entire population."

PHARMINTECH MONITOR

An overview of the international pharmaceutical market and industry, with particular attention to future developments: this is **Pharmintech Monitor**, the Pharmintech Observatory developed with the collaboration of the UCIMA Study Center.

A pool of experts and analysts has studied the reference markets for Life Science, offering privileged perspectives and points of view, based on economic data, statistics and research: from worldwide growth rates to a more detailed look at key markets - in particular Europe and the United States.

Pharmintech Monitor is available to all operators who attended Pharmintech 2019.

PHARMINTECH AWARDS AWARDED THE MOST INNOVATIVE START-UP IN LIFE SCIENCE

With the collaboration of the **Golinelli Foundation** and **G-Factor** - the incubator/accelerator aimed at emerging entrepreneurial realities, inaugurated on February 25th in Bologna - Pharmintech 2019 hosted the 10 most promising start-ups, selected by a team of scientists and business experts among 124 projects sent for the 2018 edition of the *Call for Ideas & Start-up First Edition 2018 Life Science Innovation*. Among them, Pharmintech awarded the most interesting project, with the support of the event's partners. The €3,500 prize, provided by Pharmintech in collaboration with the sponsor of the initiative, **Hewlett Packard Enterprise**, went to **RELIEF**, a spin-off of the **Scuola Superiore Sant'Anna** in Pisa, which has created and patented miniaturized devices with a magnetic activation, specific for the treatment of diseases affecting the urinary system.

BOLOGNA HEALTH WEEK

Thanks to the conjunction with **Cosmofarma**, the event dedicated to the world of pharmacy scheduled from 12 to 14 April 2019, Pharmintech helped to involve the entire drug supply chain in Bologna. From 9 to 14 April, the **Bologna Health Week**, organized under the patronage of **Federfarma Bologna** and the **Municipality of Bologna**, involves citizens in prevention activities: almost 90 pharmacies in Bologna provide clinic tests.
